

U.S. PATENT APPLICATION
Inventors: Covington et al.
Filed: June 14, 2001
Attorney Docket No. 11421/5

CLAIMS:

1. A method for providing information in response to an inquiry submitted by a User, the method comprising:

5 identifying the User by associating the user with a predefined profile;

identifying a first search parameter based on the inquiry;

formulating a search parameter based on the user's profile and the first search parameter;

10 searching a first database for a first record relating the first search parameter; and

providing the user with the first record.
